ORGEVIT®

High Performance Organic Fertilizer
For Soil Health and Fertility

ORGEVIT®

For Soil Health & Fertility

Conventional Growing

ORGEVIT® is a 100% natural fertilizer designed to restore soil fertility and improve soil structure. It increases organic matter, enhances microbial activity, and provides well-balanced nutrition for a wide range of crops. As MeMon's flagship product, ORGEVIT has supported farmers and growers worldwide for more than 25 years.

Product Description

- Balanced organic fertilizer; NPK 4-3-2.5 PFC1(A)(I)
- Made from high-quality chicken manure
- 100% natural, no chemical or other additives
- High content of stable organic matter
- Free from pathogens and weed seeds
- Low in chlorine
- Produced in compliance with EU Regulation (EU) 2019/1009

Key Benefits

- Improves soil texture and long-term fertility
- Enhances nutrient and water retention capacity
- Encourages natural humus formation and soil vitality
- Contains humic and fulvic acids for enhanced nutrient uptake and soil regeneration
- Supports sustainable soil productivity year after year

Product Characteristics

	% on total product
Dry matter	90
Organic matter (loss on ignition at 550°C)	65
C/N ratio	9
Nitrogen (N) total	4
<i>Nitrogen (N) organic</i>	3.6
Phosphate (P ₂ O ₅) total	3
Potassium (K ₂ O) total	2.5
Magnesium (MgO) total	1
Calcium (CaO) total	9
Bulk density	650-750 kg/m ³
Product appearance	Pellets (4-5 mm)

Net N mineralization

N-mineralization as % of total N-input

Dosage Recommendations

Crop	kg/ha
Open field vegetables	1.000 - 3.000
Greenhouse vegetables	2.000 - 3.000
Broadacre crops	2.000 - 3.000
Grains and rice	900 - 2.600
Fruit trees & orchards	1.500 - 3.000
Vineyard	1.000 - 2.000
Ornamentals & floriculture	1.500 - 2.500
Tree nurseries & perennials	1.000 - 2.000
Lawn and sports turf	1.000 - 1.500

Dosage recommendations are based on average crop requirements. The exact rate depends on crop type, climate, and soil conditions. For tailored guidance, please contact MeMon or your local consultant.

General Application Advice

- Apply 7–10 days before sowing or planting and incorporate into the topsoil layer
- In established crops, apply as a top or row application at 15–20 cm distance from the root zone
- Apply before rainfall or irrigate after application to activate nutrient release
- Split applications if needed, depending on crop type and soil conditions

Storage Conditions

- Store in a dark, cool but frost-free and dry place
- Keep away from water and moisture
- Do not leave the bag open after use; always reseal the packaging tightly
- Do not store together with food products
- Minimum shelf life of three years after production; longer if stored correctly

Safety & Environmental Information

- Not intended for ingestion. Wash hands after use. Don't breath in dust
- In case of an accident or if you feel unwell, seek medical advice
- Keep away from children and pets

MeMon B.V.
